SALES EXECUTIVE PERFORMANCE DASHBOARD

Data Analysis and Business Intelligence Project Using Microsoft Excel

Prepared By: Bullam Sagar

Role: Aspiring Data Analyst

Tool Used: Microsoft Excel (Pivot Tables, Pivot Charts, Slicers, VBA)

Dataset Source: Kaggle

Project Type: Sales Analytics Dashboard

TABLE OF CONTENTS

1. Executive Summary
2. Business Problem Statement
3. Project Objectives
4. Dataset Description

11. VBA Automation Implementation
12. Sales Performance Analysis
13. Region-Wise Analysis
14. Top and Bottom Performer Analysis
15. Dashboard Insights
16. Business Recommendations
17. Conclusion
18. Skills Demonstrated

1. EXECUTIVE SUMMARY

Organizations require timely and accurate sales performance reporting to monitor employee productivity and achieve business targets. This project presents an interactive Sales Executive Performance Dashboard developed in Microsoft Excel.

The dashboard analyzes sales performance data of sales executives across multiple regions and enables management to:

- Monitor Total Sales
- Track Target Achievement
- Identify Top Performers
- Identify Low Performers
- Compare Regional Performance
- Analyze Sales Gaps
- Generate Interactive Reports

The final solution combines Excel reporting, data visualization, and VBA automation to create a professional business intelligence dashboard.

2. BUSINESS PROBLEM STATEMENT

Sales managers often face challenges in monitoring employee performance across different regions.

Key business questions include:

- Which sales executives are achieving the highest sales?
- Which employees are underperforming?
- What percentage of targets are being achieved?
- Which regions generate the best results?
- How far are employees from reaching their targets?
- How can management quickly filter and analyze regional performance?

The organization required an automated dashboard capable of answering these questions efficiently.

3. PROJECT OBJECTIVES

The primary objectives of this project are:

Objective 1

Analyze sales performance of all sales executives.

Objective 2

Measure target achievement percentage.

Objective 3

Identify top-performing and low-performing employees.

Objective 4

Evaluate regional sales performance.

Objective 5

Create an interactive dashboard for business users.

Objective 6

Implement automation using VBA macros.

4. DATASET DESCRIPTION

The dataset was collected from Kaggle and contains sales-related information for sales executives.

Dataset Size

- Total Records: 140+
- Data Type: Structured Sales Data
- Source: Kaggle

Business Context

Each record represents a sales executive and their sales performance against assigned targets.

5. DATA DICTIONARY

Column Name	Description
Emp Code	Unique Employee Identifier
Sales Executive	Employee Name
Region	Sales Territory
Day 1	Sales on Day 1
Day 2	Sales on Day 2
Day 3	Sales on Day 3
Day 4	Sales on Day 4
Day 5	Sales on Day 5
Day 6	Sales on Day 6
Total Sales	Sum of Sales Across Days
Target	Assigned Sales Target
Target Hit %	Percentage of Target Achieved

Column Name	Description
-------------	-------------

Away From Target % Remaining Percentage to Reach Target

6. DATA CLEANING AND PREPARATION

The raw dataset was transformed into a structured format suitable for reporting and analysis.

Activities Performed

- Removed inconsistencies
- Checked data completeness
- Standardized table format
- Applied number formatting
- Created Excel Table Structure
- Validated sales calculations
- Prepared fields for Pivot Tables

Excel Features Used

- Format as Table
- Cell Styles
- Conditional Formatting
- Sorting
- Filtering

7. EXPLORATORY DATA ANALYSIS (EDA)

Initial analysis focused on understanding:

Sales Distribution

Analyzed total sales values across employees.

Regional Trends

Compared sales across regions.

Target Achievement

Measured employee success against assigned targets.

Performance Variability

Studied differences between high and low performers.

8. KPI FRAMEWORK

The dashboard tracks four primary KPIs.

KPI 1 – Total Sales

Measures total revenue generated by sales executives.

Formula:

Total Sales = Sum(Day1)

KPI 2 – Target Achievement %

Measures target completion.

Formula:

Target Achievement % = (Total Sales ÷ Target) × 100

KPI 3 – Away From Target %

Measures remaining target gap.

Formula:

Away From Target % = 100 – Target Achievement %

KPI 4 – Regional Performance

Measures contribution of each region toward overall sales.

9. PIVOT TABLE DESIGN

Four Pivot Tables were created.

Pivot Table 1

Rows:

- Sales Executive

Values:

- Total Sales

Purpose:

Identify Top 5 Performers.

Pivot Table 2

Rows:

- Sales Executive

Values:

- Total Sales

Purpose:

Identify Bottom 5 Performers.

Pivot Table 3

Rows:

- Sales Executive

Values:

- Target Hit %

Purpose:

Compare target achievement.

Pivot Table 4

Rows:

- Sales Executive

Values:

- Away From Target %

Purpose:

Analyze performance gaps.

10. DASHBOARD DESIGN AND DEVELOPMENT

The dashboard was developed in a dedicated worksheet.

Components

- Header Section
- Region Slicer
- KPI Pivot Tables
- Bar Chart
- Pie Chart

- Line Chart
- Interactive Controls

Design Principles

- User-friendly layout
 - Minimal scrolling
 - Interactive filtering
 - Visual consistency
-

11. VBA AUTOMATION IMPLEMENTATION

To improve user experience, VBA was integrated with Form Control Checkboxes.

Objective

Allow users to independently connect or disconnect Pivot Tables from the Region Slicer.

VBA Logic

When Checkbox = TRUE

- Pivot Table connected to slicer.

When Checkbox = FALSE

- Pivot Table disconnected from slicer.

Benefits

- Better dashboard flexibility
 - Improved report customization
 - Enhanced user interaction
-

12. SALES PERFORMANCE ANALYSIS

The dashboard highlights employee performance through Total Sales metrics.

Key Findings

- High-performing executives generated significantly greater sales volumes.
- Performance differences were visible across regions.
- Certain employees consistently outperformed others.

Management can use these insights for recognition and incentive programs.

13. REGION-WISE ANALYSIS

The Region Slicer enables users to filter dashboard metrics dynamically.

Benefits

- Regional comparison
- Local performance monitoring
- Territory evaluation

Business Value

Managers can identify:

- Strong performing regions
- Underperforming territories
- Growth opportunities

14. TOP AND BOTTOM PERFORMER ANALYSIS

Top Performers

Characteristics:

- High sales volume
- Better target achievement
- Consistent performance

Business Impact:

- Revenue growth
- Team leadership opportunities
- Best-practice benchmarking

Bottom Performers

Characteristics:

- Lower sales volume
- Lower target achievement
- Larger performance gaps

Business Impact:

- Training opportunities
- Process improvement
- Coaching requirements

15. DASHBOARD INSIGHTS

The dashboard provides the following business insights:

Insight 1

Top-performing employees contribute a significant portion of total sales.

Insight 2

Target achievement varies substantially across employees.

Insight 3

Regional performance differences indicate market variation.

Insight 4

Interactive filtering improves management decision-making.

Insight 5

Automation reduces manual reporting effort.

16. BUSINESS RECOMMENDATIONS

Recommendation 1

Implement performance-based incentive programs.

Recommendation 2

Provide coaching to low-performing employees.

Recommendation 3

Replicate best practices from top-performing regions.

Recommendation 4

Monitor target achievement monthly.

Recommendation 5

Expand dashboard with Power BI integration for enterprise reporting.

17. CONCLUSION

The Sales Executive Performance Dashboard successfully transforms raw sales data into actionable business insights.

Using Microsoft Excel, Pivot Tables, Charts, Slicers, and VBA automation, the solution enables management to monitor performance, evaluate targets, analyze regions, and make data-driven decisions.

The project demonstrates practical business intelligence capabilities and showcases the ability to build professional reporting solutions using Excel.

18. SKILLS DEMONSTRATED

Technical Skills

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Data Cleaning
- Dashboard Development
- VBA Programming
- Slicers
- KPI Design
- Data Visualization

Analytical Skills

- Sales Analysis
- Performance Measurement

- Business Reporting
- Trend Analysis
- Decision Support

Business Skills

- Stakeholder Reporting
 - KPI Development
 - Performance Monitoring
 - Business Intelligence
-

PROJECT OUTCOME

A fully interactive Excel dashboard capable of:

- ✓ Monitoring sales performance
- ✓ Tracking target achievement
- ✓ Comparing regional performance
- ✓ Identifying top and bottom performers
- ✓ Providing management-ready insights
- ✓ Automating report interaction using VBA
